CNC SWISS MACHINING

With a wide variety of CNC Swiss turning centers, NSM is capable of machining complex design components up to 1-1/2” in diameter. These state-of-the-art Swiss turning centers will produce longer, small diameter parts with efficiency and accuracy. Multi-Axis live tooling is available for simultaneously machining secondary operations such as tapped holes, slots and grooves.

MULTI-SPINDLE SCREW MACHINING

NSM has numerous automatic screw machines capable of turning components up to 2-3/8” diameter. Multi-Spindle capabilities allow multiple tools to cut numerous work pieces simultaneously. This process is utilized for rapid and accurate production of countless varieties of duplicate parts from almost any material.

MICROMACHINING

Micromachining is an intricate process that requires precision equipment and experienced personnel in order to produce accurate, repeatable results. Our CNC Swiss, Multi-Spindle Screw and Escomatic Machines are ideal for producing small components that require precise tolerances and fine surface finishes.

MULTI-AXIS CNC TURNING

NSM has several Multi-Axis CNC turning centers capable of machining components up to 8” in diameter. Live tooling eliminates secondary operations which increases throughput, efficiency and eliminates additional setup charges. These sophisticated machining centers are capable of performing a wide variety of operations including simultaneous turning, milling, drilling and tapping.

CNC MILLING

Vertical CNC machining centers are available for secondary milling operations or providing a complete machined component. Multiple machining operations may be performed in the same setup with a variety of tools on these sophisticated CNC machining centers. Precise dimensions and tolerances are achievable on the most complex design components.

PRODUCTION MACHINING

NSM offers low, medium and high volume production machining and assembly services for a wide variety of industries and OEM markets. From prototype to production, our highly skilled machinists and well defined processes allow us to produce complex components accurately and with the highest efficiency.

MECHANICAL ASSEMBLY

Mechanical assembly and design assistance is available for value added projects. Our engineering, quality and sales staff work collectively with each customer and project to ensure that the proper dimensions, tolerances and assembly guidelines are established and achieved.

All vendors and suppliers must comply with Necedah Screw Machine’s Code of Conduct Ethics Policy.

INVENTORY MANAGEMENT PROGRAMS

NSM’s inventory management programs will support tracking and control of your machined components and assemblies. In addition to streamlining blanket order releases, we are able to provide customers with fast and accurate responses to support unique and specific delivery requirements. We offer Vendor Managed Inventory (VMI) programs including JIT, ASN, EDI and Kanban.

INDUSTRIES SERVED

• Aerospace
• Instruments
• Automotive
• Medical
• Communication
• Military/Defense
• Construction
• Government
• Daily
• Electrical
• Railways
• Electronics
• Robotics
• HVAC systems
• Energy
• Satellites
• Aerospace
• Transportation

Applications Served

Appliances, Archery, Controls, Door & Window Hardware, Fiber Optic, Fluid Optic, Fluid Power Systems, Furniture Office Equipment, Instrumentation Components, Lawn & Garden, Machinery, Molded Inserts, Motion & Control Systems, Musical Instruments, Pumps, Recreational Products, Semi-Conductor and Valves

Materials

• Stainless Steel • Titanium
• Monel • Plastics
• Alloy Steel • Aluminum
• Brass • Low Carbon Steel
• Inconel • Stainless Steel
• Bronze • Monel
• Steel • Inconel

In order to support our large OEM programs, NSM partners with a vast number of material suppliers. We continually negotiate material costs and quality standards from each and every supplier which insures the consistency and quality of our machining. As part of our ODM service program, our suppliers are required to comply to the Conflict Minerals Requirements/Dodd-Frank Act.

Value-Added Services

Anodizing, Brazing, Plating, Burnishing, Passivation, Grinding, Knurling, Heat Treatment, Stamping, Bending, Fabrication and Mechanical Assembly.

Why Choose NSM?

✓ Solution provider for your complex machining needs
✓ Broad scope of capabilities and services
✓ Seasoned machining talent and cutting edge technology solutions
✓ Longstanding corporate stability, leadership and risk avoidance
✓ Qualified and developed supply chain partners
✓ Technical engineering support
✓ Outstanding quality and on-time delivery
✓ Inventory Management Programs
✓ Superior customer service

About Necedah Screw Machine Products

Established in 1973, Necedah Screw Machine Products, Inc. is nationally recognized as a premier supplier of precision machined components and assemblies. NSM provides products and services to a wide range of industries and OEM markets across the country. Our seasoned machining and engineering talent allows us to take on the most difficult projects and complex design parts to meet your needs. Our commitment to providing reliable products and services enables us to establish and maintain very strong partnership programs with our clients.

Our 60,000 square foot facility houses over 40 turning centers including multi-axis and multi-spindle capabilities. In addition, we offer vertical CNC milling and numerous value-added services to accommodate projects with diverse components and assemblies.

NSM’s inventory management programs will support tracking and control of your machined components and assemblies. In addition to streamlining blanket order releases, we are able to provide customers with fast and accurate responses to support unique and specific delivery requirements. We offer Vendor Managed Inventory (VMI) programs including JIT, ASN, EDI and Kanban.

In order to support our large OEM programs, NSM partners with a vast number of material suppliers. Providing Specialty Machining and Assembly Services for over 50 Years!

YOUR PARTNER IN PRECISION

AN ISO 9001:2008 CERTIFIED COMPANY

Please contact Necedah Screw Machine Products, Inc. today for your precision machining and mechanical assembly needs.

You will discover that our commitment to quality, on-time delivery and responsiveness is second to none.
